ABOUT ME

A 6th-semester Computer Science student with strong foundations in machine learning, data analysis, and software development. Experienced in developing and working on projects involving predictive analytics and real-world problem solving. Possesses a solid understanding of object-oriented programming, database management, and full-stack application development. Demonstrates analytical thinking, problem solving skills, and adaptability to work with a team while continuously learning and improving in dynamic environments.

EDUCATION

BINUS University

Aug 2023 - 2027 (Expected)

- Undergraduate in Computer Science Global Class | Current GPA: 3.67/4.00
- Relevant coursework: Artificial Intelligence, Machine Learning, Data Mining, Computer Vision, Natural Language Processing, Software Engineering

Universiti Malaya (1 Semester Study Abroad)

Feb - Jul 2026

- Relevant coursework: Data Analytics, Soft Computing, Information System

ORGANIZATION & COMMITTEE EXPERIENCE

HIMTI (Himpunan Mahasiswa Teknik Informatika) BINUS

Publication and Marketing Division

- Creating and managing HIMTI's X account (previously Twitter) focusing on education contents.

Technical Team of HISHOT 2024

Jan 2024 - Dec 2024

- Responsible for the technical aspect of the event.

ACHIEVEMENT

Presented and Published Paper on ICORIS 2025

"Fake News Detection Utilizing Ensemble Learning and Explainable AI"

- Designed a high-accuracy, explainable fake news detection framework that integrates ensemble learning (XGBoost, LightGBM) and interpretable AI (SHAP, LIME) to improve transparency.

PROJECTS

Semantic Anime Recommendation

- Developed a semantic anime recommendation system with a unique pipeline that gave an accurate and explainable results from natural language queries.

Automated Car Damage Segmentation for Insurance Claims

- Built an automated system to detect and segment car damage for faster, more accurate insurance claim assessment using computer vision.

Drug Approval Prediction

- Developed a ML-based drug approval prediction system using molecular descriptors and ensemble models to support early-stage pharmaceutical decision making and prevent loss during the development process.

AniSwipe

- Built swipe-based anime discovery app using Next.js, TypeScript, Supabase, and Jikan API with MyAnimeList integration and personalized user lists.

Mathe

- Built a full-stack math education platform using PHP, MySQL (XAMPP), and JavaScript with user authentication, quizzes, and learning materials.

KEY SKILLS

SOFTSKILLS

- Quick Learning & Adaptability
- Problem Solving & Analytical Thinking
- Clear Communication & Open to Feedback

HARDSKILLS

- Machine Learning:** NLP, Computer Vision, Explainable AI, Regression, Classification
- Programming Languages:** Python, Java, JavaScript, SQL, HTML, CSS, C, C#, C++
- Certifications:** English (IELTS 7.5), Alibaba Cloud ACA: Cloud Engineer, AWS Educate: Cloud 101, AWS Educate: Compute
- Tools & Frameworks:** PowerBI, Excel, XAMPP, Supabase, Next.js, React, Laravel, TensorFlow, PyTorch, scikit-learn
